CONTENTS OF VOLUME 12

Volume 12 Number 1 1993

The coupled equations problem of the quantum theory of atom–diatom reactive scattering

F. MRUGAŁA, *Nicholas Copernicus University, Toruń, Poland* 1

Light scattering in the study of colloidal and macromolecular systems

P. JOHNSON, *Cavendish Laboratory, Cambridge, UK* 61

Dielectric studies under pressure on plastic and liquid crystals

A. WÜRFLINGER, *Universität Bochum, Bochum, Germany* 89

Controlling the quantum numbers in chemical reactions. Reactivity and energy transfer of highly vibrationally excited molecules

X. YANG and A. M. WODTKE, *University of California, Santa Barbara, USA* 123

Dynamics and structure of aromatic molecular van der Waals complexes

M. R. TOPP, *University of Pennsylvania, Philadelphia, USA* 149

Volume 12 Number 2 1993

Rotational line intensities in zero kinetic energy photoelectron spectroscopy (ZEKE-PES)

F. MERKT, *Université de Paris, Orsay, France*, and *Physical Chemistry Laboratory, University of Oxford, UK* and T. P. SORTLEY, *Physical Chemistry Laboratory, University of Oxford, UK* 205

Density-functional studies of electronic properties of polymers

M. SPRINGBORG, *Fakultät für Chemie, Universität Konstanz, Germany* 241

Infrared emission studies of the vibrational deactivation of benzene derivatives

J. R. BARKER, *The University of Michigan, Ann Arbor, USA* and B. M. TOSELLI, *INIFIQC, Departmento de Fiscoquímica, Universidad Nacional de Córdoba, Argentina* 305

Multireference coupled cluster method for electronic structure of molecules
N. OLIPHANT and L. ADAMOWICZ, *University of Arizona, Tuscon, UK* 339

Experimental characterization and computational simulation of chemical reaction dynamics. A case study

P. M. AKER, *University of Pittsburgh, USA* and J. J. VALENTINI, *Columbia University, New York, USA* 363

Index of authors (with titles of papers) 391
